Training of Trainer in the Use of the Open Makerspace Toolkit

Welcome to the Open Makerspace Toolkit Training of the Trainer Workshop!

We're thrilled to have you join this Training of Trainers Workshop for the Open Makerspace Toolkit (OMT). As facilitators, you embark on a crucial mission: equipping others to create vibrant and impactful makerspaces within their communities. This toolkit, crafted by mAkE, offers a wealth of resources and strategies for promoters and managers of makerspaces to enhance their offerings and engage their communities.

This toolkit, crafted by mAKE, offers a wealth of resources and strategies for promoters and managers of makerspaces to enhance their offerings and engage their communities.

Business models for building sustainable impact economies

Building sustainable impact economies within makerspaces involves establishing business models aimed at fostering social, environmental, and economic well-being within these creative hubs. These models focus on creating positive impacts while generating revenue and supporting local communities. Choices include offering services, supporting startups, and providing training to empower individuals and businesses within the makerspace ecosystem. This section provides insights into business models for building sustainable impact economies within makerspaces, highlighting their potential impacts, advantages, challenges, and complementary models tailored to the unique context of these creative hubs. This chapter is built on the the Open Business catalog developed by WP1 oif the mAKE project.
